

Dear Iryna Zhuravlova,

Thank you for contacting Elsevier Helpdesk regarding the request to setup email domain remote access. I am happy to assist you.

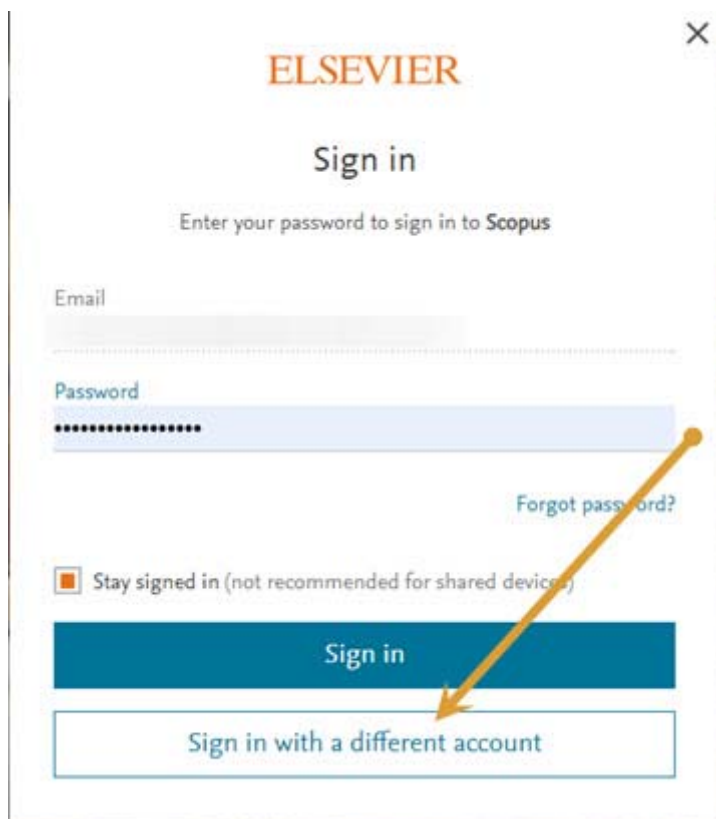

Upon checking, the email domain: [@karazin.ua](#) is already registered in the institution's account. I have successfully added the email domain: [@univer.kharkov.ua](#) to the institution's account for remote access. Please allow 24 hours for the email domain: [@univer.kharkov.ua](#) to activate in our system

For users with the said email domains, they can refer refer to the steps below on how to activate the remote access in Scopus.

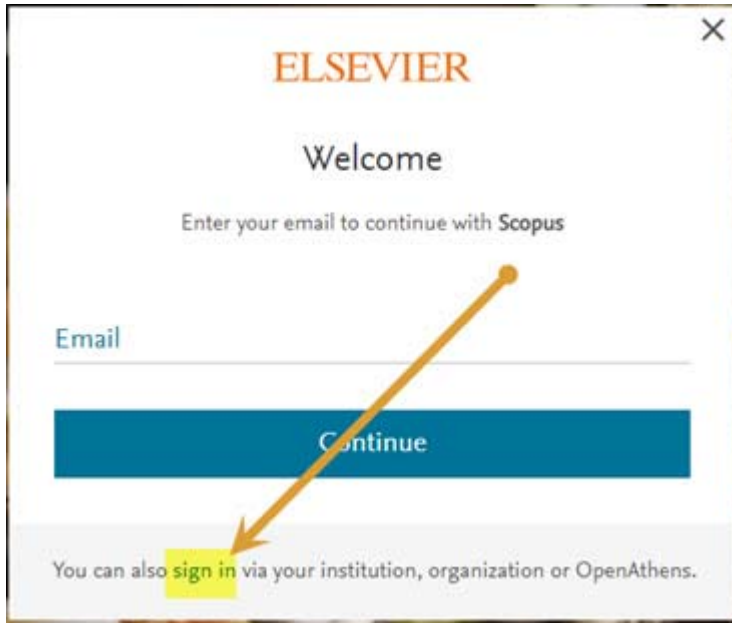

1. Click Sign-in at the header in Scopus.

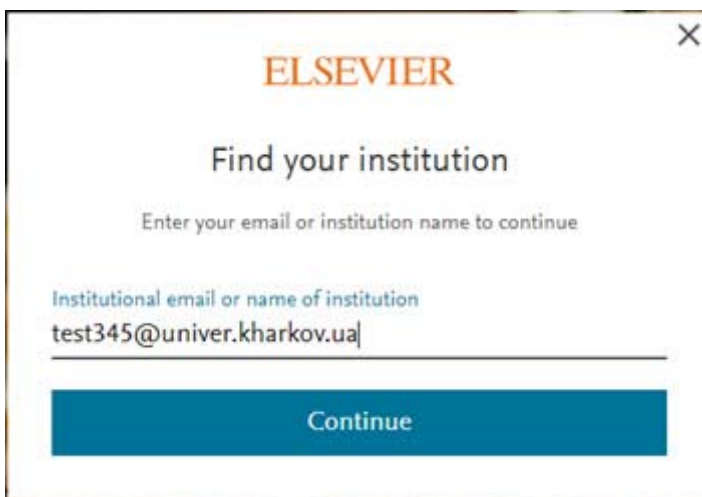

2. In the Sign-in page, please click the button "Sign in with a different account".

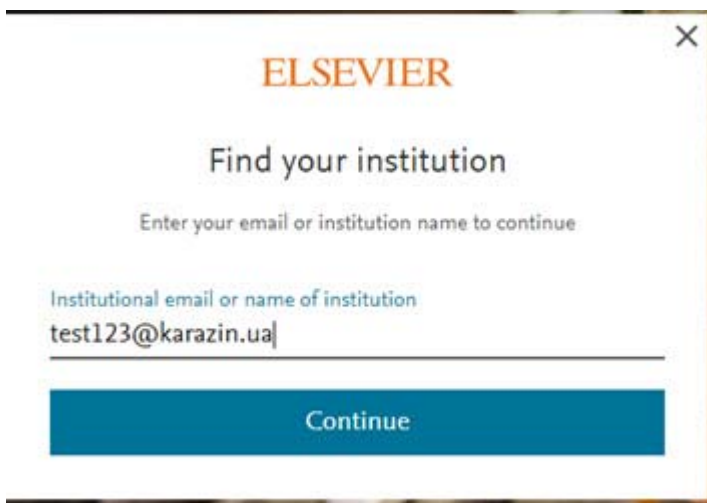

3. You will be routed to the Welcome page, please click the small link "Sign in via your institution".

4. In the "Find your institution" page, please enter the institutional email address and click Continue

OR

5. The users will be informed to check their inbox for the email with the activation link.

Note: Please allow 24 hours for the email domain: @univer.kharkov.ua to activate in our system for the users to use for remote access
